

a first screen display in which a customer inputs a destination electronic mail address through said input means,

*b2 Printed*  
a second screen display of customer-selectable options, the options comprising transmitting the transaction record to the destination address, printing the transaction record at said facility, and both transmitting the transaction record to the destination address and printing it at said facility, and wherein the transaction record is transmitted, printed, or both transmitted and printed, depending upon the option selected by the customer, and

*C1 Cont*  
a third screen display in which a number n is input through said input means, the number n representing a number of transaction records to transmit and comprising one new transaction record and n-1 past transaction records; and

communication control means for controlling communications with the host computer, wherein said display control means causes said display device to display transaction options comprising a payment option and an option to register an electronic mail address,

wherein when a customer selects the option to register the electronic mail address and inputs an electronic mail address, said communication control means transmits the input electronic mail address via the communication line to said host computer so that the electronic mail address is registered in association with the transaction information file for customers,

wherein when the electronic mail address is registered, when a transaction is performed through an operation of said input means in accordance with the transaction options, said display control means displays on said display device a third screen display of options comprising an option to transmit the transaction record to the registered electronic mail address and an option to transmit the transaction record to an electronic mail address other than the registered electronic mail address, and

wherein when a customer selects the option to transmit the transaction record to an electronic mail address other than the registered electronic mail address, said display control means displays on said display device a fourth screen display in which a new destination electronic mail address for the transaction record is input through said input means.

*G2 F2 Contd*  
10. (TWICE AMENDED) A method for performing transactions at a consumer transaction facility, comprising:

displaying selection options to transmit a transaction receipt to a destination address, print the transaction receipt at the consumer transaction facility, and both transmit the
